

INSTANT RICE

A surprisingly good result

Did you know that...?

It is a **new quality** among instant rice available on the market, thanks to the use of **appropriately selected** technological processes.

Benefits

After being poured with water, it **rehydrates very quickly**, without sticking, while keeping the **taste of cooked rice**.

Properties

Instant rice

1

loose, without clumps or lumps

2

low bulk density

3

quick to prepare

4

the ability to adjust the softness and rehydration time

5

does not stick together, has a uniform texture

6

keeps the flavour of cooked rice

Application, among others:

Ready meals

Baby food

Instant meals

Dairy products
