

MIRVAC[®] WITH INFUSION

superfruits

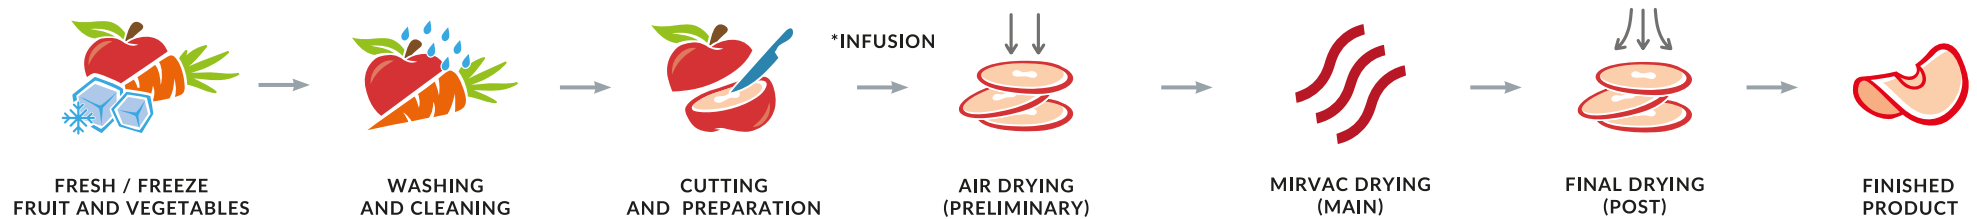

Description:

The method consists of enriching the final product with **high-quality functional ingredients** (such as fibre, inulin, vitamins, concentrated juices or honey) to give it specific properties and increase its nutritional value. Thanks to this, the finished products have a diverse **form, crispiness and texture** which meet the highest requirements of customers.

Main advantages of the technology:

- modern and innovative
- microbiologically clean
- adaptation of products to individual needs
- various textures

Production process:

Product categories:

- superfruits
