

PRODUCTION OF INSTANT RICE AND GROATS

exceeding expectations

Description:

The products have a solid and uniform texture for a long time, retain the **taste of the cooked raw material and are not sticky**. The use of various process parameters allows you to tailor the **final product to the customer's needs** in terms of hardness, viscosity and rehydration time.

Main advantages of the technology:

- low bulk density
- rapid rehydration
- possibility of customising the parameters to the customer's requirements

Production process:

Product categories:

- instant rice
- instant groats
